TCS TESTIMONY: Software Project Contest

Nikhil Goel (Roll no. 14455) and Deepak Vashisth (Roll no. 14413) reached the finals of TCS Testimony, Software Testing Contest held on 8th September 2014. TCS Testimony is an automation software testing competition conducted worldwide. This time the competition was for automation tools 'Selenium' and 'Jmeter'. Competition consisted of total three rounds out of which two rounds were online and the Grand Final was organized at the TCS centre at Sholinganallur, Chennai, Tamil Nadu, India. 8000 teams participated in round one out of which 298 teams was able to make up to round two. 10 teams selected for the grand finale. Team of DCE, Gurgaon was one of them. After quick introduction, every team was given a task sheet. Our Team used "Selenium" tool, Eclipse IDE, Microsoft Excel sheets and Firebug 2.0.6. It was followed by an hour of mind-boggling coding. Finally our team stood 4th and was offered an internship as well as a 'placement offer'. Over all it was great learning experience.

Participants at Grand Finale

IBETO EXCEL 2014: Project Competition

Innovation for Better Tomorrow (IBETO) event is a part of Excel Mec Fest sponsored by IEEE and organised by the Govt. Model Engineering College Kerala on 27th September 2014. Nikhil Goel (Roll no. 14455), Gaurav Sharma (Roll no. 14422), Monu Mukerya (Roll no. 14448) and Ishaan Madan (Roll no. 14430), students of IT VII semester, reached the finals of IBETO Excel 2014. Students from DCE, Gurgaon bagged a cash prize of Rs 5000/- and 4th position in this event.

PROJECT COMPETITION : GAME CHANGER, IIT BOMBAY

Saurabh Kumar and Sarthak Budhiraja's (IT VthSem) project idea for Game Changing technology "Automatic Distance teller" is selected for the Finals. Total 15 teams all over India have been selected on the basis of the innovativeness and feasibility of the idea. Their device will work in the games involving "Throwing ". The distance of the object thrown is usually measured by measuring tape by one or more officials. This method will change this forever. In this particular case we will be putting our focus on Discus throw. The method will involve the use of a sensor which will be placed inside the said discus and will be activated once the discus is thrown and will automatically be deactivated once the discus hits the ground. There will also be a sensor in the discus that will emit the data to a receiver. This method will be highly effective and save a lot of time. This would not only save a lot of time but would also make the game a lot fairer.

Saurabh Kumar

APPRECIATION MAIL RECEIVED FROM CMC MANAGING DIRECTOR

Himanshu Sharma has received an appreciation mail from CMC Managing Director, Mr. R Ramanan for presenting his paper in the IEEE GHTC Conference at Silicon Valley, USA and also for his Article published in TOI. He has also been invited to CMC R&D Labs for a Guest Talk.
