## From Editor's Desk :

A successful technocrat is one who is creative and innovative, who has problem solving aptitude and skills at his command, and who is able to participate in multi-cultural and multi-national environment.

The world is changing rapidly and so are the challenges for technocrats, professionals, managers and leaders. Gaining state-of-the-art knowledge both in the theory and practice is vital to be successful in today's dynamic environment.

We are well known for conducting International/National Seminars/Faculty Development Programs; Aptitude Training for students; Technical enhancement workshops; technical project fabrication , Research and publication etc.

**DCE, Gurgaon** endeavor to pledge a conducive and congenial environs where all the three components of a personality - body, mind and soul grow harmoniously and in perfect equilibrium. The class rooms are well equipped with Digital technologies to rejuvenate the teaching-learning process with a focus to sharpen the problem solving skills of the students.

## From HOD's Desk :

The Department of Computer Science and Engineering has been moulded with the primary objective of furnishing world class education in the field of Computer Science. We at the department of CSE believe that learning is a continuous process and does not end with the acquisition of a degree, especially because steady and rapid advances in computing technologies shorten the life of tools and techniques prevalent today. Students are given a strong foundation in Computer science and problem-solving techniques, and are made adaptable to changes.

Here, we lay great emphasis on the emerging, interdisciplinary, cutting-edge areas of research. Our faculty members are already involved in interdisciplinary research efforts. We believe that this approach to teaching-learning, coupled with practical experience acquired during Industrial Training and Practice School Project work in reputed organizations, equips our students to handle the challenges posed by the industry.

Our students are also involved in co-curricular and extracurricular activities. Students also maintain local chapters of professional societies like IEEE, ISTE, and CSI etc.
