VOL II ISSUE XV

ISSUE OF APPLIED SCIENCES AND HUMANITIES DEPARTMENT

*Wishing all
Dronacharyians
a Happy Diwali !!*

From HOD's Desk :

Dronacharya College of Engineering started its long journey towards a distant horizon-with many promises to keep- and cruising along we have reached a stage where we are on the verge to complete the first decade, since the establishment of this Institute. The faith and confidence of the parents and students has enabled us to diversify and expand our operations with each passing year. This year we have introduced the most **modern branch-Bio Medical** in our Institution.

The Department of Applied Sciences and Humanities is all poised to greet the **10th Batch** of the college and to set the pace for mould and shape the lives of our new entrants who are on the threshold of beginning their technical education right upto interview. The Department of Applied Sciences and Humanities provides an access to the basic but diverse subjects, which serve as a foundation for the courses of higher semesters in different streams.

The basic course material enriched with the good sense and essence distilled from the Faculty's experience of years, together with a commitment to provide quality education, helps in fostering an intellectually stimulating work environment. We aim at providing a foundation to such engineers who have sky-high spirits and who in their arena present the **"brave new world"**, blazing a trail of glory, who can vie with the rest of the world on equal terms of competition. In a nutshell, the Department of Applied Sciences and Humanities, with a pledge to serve the society better, is making rapid strides in lightening up the path of students spearheading towards unprecedented progress. In this direction, with a view to update the teaching methods, the Department has been provided with the facilities of **LCD projectors** in the class rooms.

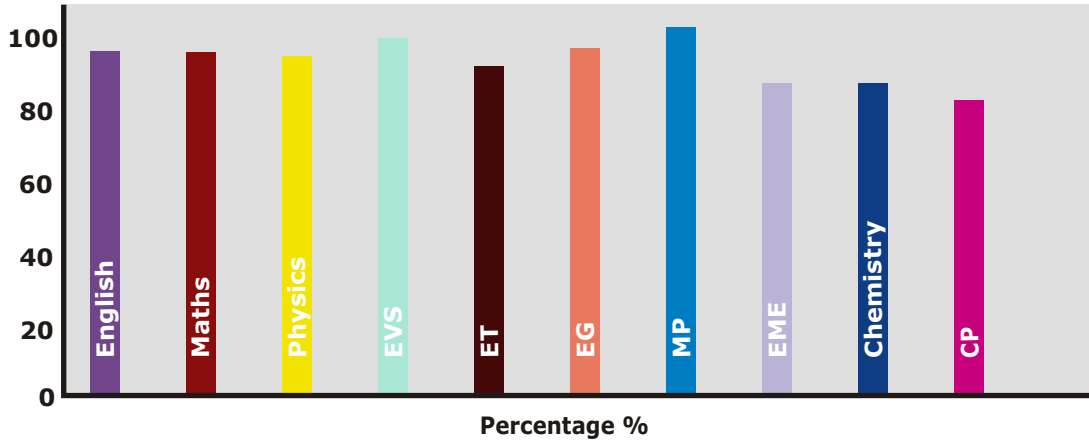

Head of the Department, (Dr. S. K. Gupta)

Merits And Achievements:

The Quality Policy and Objective of College is to achieve 100% result and the Department of Applied Sciences and Humanities has reached the target in almost all subjects. We are working tirelessly to bring in laurels to the College.

The Subject-wise result of the II Semester (June-2007) is given below:

Photographs of some talented students who are taking award from our Hon'ble Chairman, Dr. Satish Yadav.

Faculty Development Programme :

The faculty, the greatest asset of any teaching Institute, here is qualified, experienced, astute and keen on learning new skills and imparting quality education. The faculty here further seeks to raise its profile-with several faculty members in the Department pursuing their research work in Ph.D. The Management also sees to this that we have well-versed academic staff. Keeping in tread with that we have four new appointments in our Department this Semester for **Mathematics Dr. Rohtash Bhardwaj, Economics- Prof. (Dr.) K.G. Sharma, Bio-Technology- Dr. Sheetal Yadav and English- Mrs. Swati Tyagi.**

To reinforce its focus on innovation and growth we organize seminars for faculty members in summer working days under the **Faculty Development Programme (FDP)** in which each faculty member has to present a seminar. We conduct seminars on in-house and out-house basis. The faculty members were enlightened on various day-to-day usage topics such as **'Easy Calculation', 'Income Tax', 'Share Market'** etc. In addition to that, to enhance the know-how of the faculty, a workshop was conducted regarding aspects of **'Paper Setting'** and **'Qualities of a Good Teacher and Techniques of Effective Teaching'**. The Department also organized **'English Speaking Programme'** for the faculty members of the College to further hone their presentation and communication skills.

The Department is also planning to conduct a National Level Seminar on **"Lasers and Radiations"**. To enhance the teaching aids and improve on the education technology, the Department is planning a project under which complete modernization of classrooms will be done under the **MODROBS project**. In this scheme teaching aids such as **laptops, scanners, pen drives** etc. will be provided to the Faculty members.

The scheme aims at modernizing and removing obsolescence from the labs so as to enhance the functional efficiency of this prestigious Technical Institution for Teaching, Training and Research purposes and support new innovations in class rooms/ Teaching Technology to ensure the practical work and project work carried out by students to be contemporary and suited to the needs of Industry.

Our Department not only propels towards academic knowledge but also is directed to enhance the human aspect of the future engineers. Education is not mere possession of knowledge, but being better individuals. Keeping in touch with the humanistic approach, the Department appoints two faculty members as class counselors for each class and class representatives from the students are selected for each tutorial group from amongst both boys and girls.

Student's Viewpoint About The Department :

Being a part of this esteemed and reputed college, I feel proud to see myself at a place where the elements of knowledge, discipline and education merge to light up the lamp of success for the members of this family. The discipline maintained here is worthy of appreciation and **'Guru Shishya'** relation is certainly not to be forgotten. The Faculty members give individual attention to the students, which is unlike any other institution. Various occasions are celebrated according to our customs, tradition and culture. I fallshort of words when it comes to describing the Dronacharya family. I would just say that the glow of this institution in **'ineffable'**.

Kumud Bhardwaj
(I.T., 10363)

As the rays of the sun fall on our faces, a splendid building attracts us to itself and this building is none other than our college **'Dronacharya College of Engineering'**. Here education is a happy learning process, along with academics, the college aims at all round development of the personality of its students. Every moment is the moment of creation and each moment of creation has infinite possibilities. This becomes clear to us at this college. With what I have heard, seen and observed so far I can say that every challengemet by our institution as a whole is turned into victory, which adds a feather to our cap.

Lush green gardens, auditorium, canteen, laboratories, library, energetic and creative students, competitive staff and relishing activities mark the heritage of **Dronacharya College of Engineering** with all these facilities. We must put our mind, body and soul in order to take our college to greater heights. All of us should put our efforts for excellent results and make our college the best college ever.

Anamika Sengupta
(ECE-I-A, 10145)

Dronacharya College of Engineering has accepted education as a highway to achieve its long cherished goals. It is one of the best Technical Institutes in the state of Haryana and has the ever-growing prestige of being the best provider of facilities. The college has steadily grown marching on the path of progress from an initial intake of 120 students in the session 1998-99 to 420 in the session 2007-08. Now, the question arises what is the need to open the college? It is the kaleidoscopically growing demand for competent engineers and technocrats for equitably executing a plethora of projects in private, public and Govt. sectors across the country, the continents and the Globe, which spurred the Management to start this college way back in 1998.

The college has a widespread beautiful campus with sprawling lush green lawns in the midst of sylvan surroundings. It does not merely teach quality, productivity and efficiency but also provide an environment with an exemplary campus eulogized for quality culture, productivity-linked operation systems and admirable administration to serve the larger interest of the student community.

Suchita
(ECE-II, 10247)

Diksha Samaroh :

The Initiation or the '**Diksha**' of the **10th Batch** of the Department was on **27th August 2007**. The Department organized an Orientation Programme on the second working day of the commencement of the Semester, wherein their respective class counselors took the First Year students for a round of the college campus to familiarize them with the different Departments, their H.O. Ds and Labs and Library etc.

To celebrate the Initiation or Diksha Samaroh 2007 and welcoming of students of its 10th Batch a function was organized by the family of Dronacharya College of Engineering on the evening of **7th September 2007**. The Department of Applied Sciences and Humanities played a key-role in the arrangements of the festival, from primary role (providing dress material, back stage activity and discipline) to on stage-activities (Prize Distribution and Stage Handling). The Festival started with the welcoming of the junior students by the seniors with '**tilak**' and flower buds.

Senior students worked hard for all the preparations of the festival. They helped and guided the students for preparation of the "**Freshers' Competition**". It was a collective effort of the staff, senior students and the new students. **Mr. Abhishek and Miss Sakshi were selected as Mr. Dronacharya and Miss Dronacharya** after a tough competition of stage performance including Fashion Show, Talent Round and Question-Answer Session. Our Hon'ble Chairman, **Dr. Satish Yadav**, graced the occasion as the Chief Guest of the evening and appreciated the efforts made by the Departments and the students. Towards the end a sumptuous dinner was arranged for all the students, staff and the guests.
