

Can you make every city a **SMART CITY?**

Here's your chance to innovate a smart & meaningful solution

About KPIT Sparkle

It's Time to Take Your Chance!

KPIT Sparkle is an activity carried out by KPIT in association with College of Engineering, Pune (COEP). This is a platform for inviting bright minds of India to come up with innovative solutions. The contest is open to all Students of Science and Engineering background at Bachelor's, Master's and Doctoral level. It is expected that by the year 2030, 40% of the Indian population will become part of urban areas. The massive urbanization will bring with it huge complexities and sustainability issues for existing cities, especially the tier-2 and 3 ones. It would entail massive overhauling of our infrastructure, public services and access to growth opportunities for the citizens. We at KPIT envision every city to be a SMART CITY. Can your idea turn this vision into a reality?

The contest has two major topics in which we invite students to participate and provide ideas

- Smart Transportation
- Smart Infrastructure

Submit your idea Login

Smart Transportation	Smart Infrastructure
 <p>Non Fossil Fuel technology for transportation (Automotive)</p> <ul style="list-style-type: none"> ▪ Alternate Fuels ▪ HEV/EV/FC Solutions ▪ Energy Storage-Battery, Flywheel 	 <p>Renewable Energy</p> <ul style="list-style-type: none"> ▪ Solar, Wind
 <p>Efficient Urban mobility and Public transport</p> <ul style="list-style-type: none"> ▪ ITS & Associate solutions ▪ Safety on roads 	 <p>Robust IT connectivity & digitization</p> <ul style="list-style-type: none"> ▪ Connected Vehicles
 <p>Autonomous vehicles for last mile</p>	 <p>Data Analytics & Prognostics</p> <ul style="list-style-type: none"> ▪ Vehicle Health Monitoring ▪ Traffic Management & Optimization
