

FOURIER SERIES – MATHEMATICAL METHODS BY PROF. GOPAL SRINIVASAN FROM IIT BOMBAY

QEEE Session on Fourier Series – Mathematical Methods was organized by IIT Madras on 1st, 7th and 9th September 2016 under D2S (Direct to Student) Program. The session was delivered by Prof. Gopal Srinivasan from IIT Bombay. 45 students from III semester ECE, along with one faculty coordinator, Mr. Ashish Gambhir, Assistant Professor, ECE, attended the session. The course was divided into 3 sessions of 2 hours each.

Fourier analysis is an important component in Engineering Education and is pervasive throughout science and engineering. In this course the rudiments of Fourier analysis focusing primarily on Fourier series were discussed.
