

Live Steaming on Blueworks by IBM

A Live Steaming on Blueworks by IBM was conducted on 26th October 2016. Sixty two students of Computer Science Engineering Department attended the live streaming. The sessions were delivered by Mr. John McDonagh, Sales team, IBM Digital and he works with the IBM Digital Sales team specializing in smarter process and functionality in the cloud. In his session he covered how business processes determine how a company is run. They can make or break any organization, big or small. How fast are you reacting to changing trends are your processes enabling speed and agility or are they slowing you down IBM Blueworks Live available as a service allow you to design all your business processes quickly, easily and in a collaborative manner across the entire organization. The Session was fruitful to the students as it helped them in understanding the concept of Blueworks Live.
